

## Columbo I+ RDA Atomizer

**Manufacturer:** Columbo Vape Ltd.

**Product Code:** ATRD-01

**Availability:** In Stock

**Weight:** 18.00g

**Price:** ~~€40.99~~ €36.89

### Short Description

A robust RDA Atomizer designed to offer you exceptional feeling of **vapor taste**, **convenience in setup and use**, excellent **temperature insulation** and **maximum vapping** and wattage.

### Description

Columbo RDA I+ Atomizer has been rigorously designed to offer you a superior vaping experience with exceptional feeling of vapor taste, vapping at maximum, easy set-up and use.

### Exceptional feeling of vapor taste

The holes on the sleeve are placed at the same level with the resistance coil. This minimizes the distance between the holes and the resistance coil ensuring an exceptional feeling of vapor taste.

### Convenience in setup and use

The space within the atomizer to set up the resistance coil is relatively big with two positive consequences: on one hand, the setup gets easier while there is space for any size of resistance coil; on the other hand, there is more room for more cotton to be put and this

reduces the frequency needed to soak it.

### **Excellent temperature insulation**

Drip cap is made from peek, a material which is an excellent temperature insulator. The peek material fully insulates the temperature created within the atomizer preventing it to end up to the lips of the vaper. In addition, if you want to use another drip tip, you can do so by fixing the '510' Adapter on the drip cap and screwing your preferred '510' drip tip on the adapter. The '510' adapter is contained in the pack and made also from peek.

### **Spit-back protection**

The spit-back protection is also made from peek and enhances the control of the air temperature while, at the same time, protects the vaper from the unpleasant and annoying experience of possible spit backs.

### **Maximum vapping and wattage**

This product comes with double coil which maximizes the produced vapor and gives the vaper the option to use high wattage.

### **Robust structure with excellent finishings**

Last but not least, Columbo RDA I+ Atomizer is a top-quality robust structure, designed and manufactured with much emphasis in detail and excellent finishings.

Finally, Columbo RDA I+ Atomizers comes with an adjustable fully analog air-flow control.

### **Packaging contents:**

- '510' type drip tip adapter (1)
- Set of spare silicone O-rings (3)
- Set of M3x3 socket screws (2)
- 'L' key (1)
- Set of M2 hand screws (2)
- User manual

### **Special Description**

Columbo I+ RDA Atomizer is an outstanding and robust structure which has been rigorously designed and manufactured to offer a series of multiple benefits to the vapers:

exceptional feeling of **vapor taste, convenience in setup and use**, excellent **temperature insulation, spit-back protection, maximum vapoing and wattage**, adjustable fully analog air-flow control.

## **Specifications**

On the bottom of the atomizer, there is the common 510 type threaded connector.

Atomizer is compatible with standard '510' drip tips with the use of the included '510' adapter.

The materials are certified and of top quality; they are selected based on the best functionality in accordance with the premium build quality. All metal parts are made from stainless steel food-grade AISI 304L SS.

All insulations and plastic parts are made from peek with excellent mechanical and electrical insulation properties.

O' rings are made from silicone.

- Diameter: 22mm
- Height: 27.6mm (without drip tip)
- Net weight: 18gr (without resistance)

## **Packaging content**

- '510' type drip tip adapter (1)
- Set of spare silicone O-rings (3)
- Set of M3x3 socket screws (2)
- 'L' key (1)
- Set of M2 hand screws (2)
- User manual

## **Manual**

[Download manual in English](#) [Download manual in Greek](#)

Columbo I+ RDA atomizer has been rigorously designed to give you a superior vaping experience: exceptional feeling of taste, vapor at maximum, easy set-up and use.

To enjoy your Columbo I+ RDA vaping experience at maximum, please read through this manual for proper use and care.

## How to set up

Columbo I+ RDA set-up is very easy and completes as following:

**Step 1:** Screw the RDA on your mod.

**Step 2:** Pull out the drip cap (4) and the sleeve (6).

...rew the socket set screws (7), place the resistance coil lead into the center  
...nd tighten. Place the other end of the resistance coil lead under the head

Repeat the procedure with a second resistance coil in parallel if desired.

Step 4: Pass the cotton wick through the coil wire and put them inside the base in order to fill up the basin (by using a screwdriver)

Step 6: Place back the sleeve (6) and the drip cap (4).

## How to use

- **Step 1:** Put the spit-back protection plate (3) into the drip cap (4).
- **Step 2:** Choose either to use directly the drip cap mouthpiece or a typical drip tip by using the '510' adapter (1).
- **Step 3:** Align the sleeve airflow holes (6) so the air goes directly on the resistance coils.
- **Step 4:** Adjust the air flow control by rotating the drip cap (4) to the desired position.

## How to clean / maintain

- Disassemble the parts of the Columbo I+ RDA atomizer (drip tip, drip cap, '510')

adapter, spit-back protection plate, sleeve, base, center pole parts, peek insulations, O'rings).

- Clean the surfaces of the parts with a dry or slightly wet cloth. You can slightly wet the cloth with clean lukewarm water; you may even immerse any parts in clean lukewarm water and dry them with a clean cloth afterwards.
- For the cleaning of the holes and/or internal surfaces, you can use cotton wool or cotton buds.
- Only for the cleaning of stainless steel parts, you can wet the cotton wool or cotton buds with alcohol.

## **Cautions**

### **Cautions for use:**

- The cotton should always be saturated in liquid before firing your mod. Otherwise, the cotton will burn and you will experience burning taste.

### **Cautions when cleaning:**

- Alcohol may be used only for the cleaning of the stainless steel parts and not for the cleaning of the plastic parts.
- Make sure all parts are completely dry before use, especially those ones cleaned by alcohol. This requires leaving the parts for some time after the cleaning to allow them dry.

### **General cautions:**

**BEFORE USING THE ATOMIZER PLEASE READ THE FOLLOWING:**

- The atomizer is for vaping only, do not use for other purposes.
- Use liquids intended for vaping only.
- After setting up the resistance(s) coil(s), check carefully for short circuits. Danger by using shorted atomizer on unprotected battery mod.

Instructions for storage: Keep out of reach of children and pets.

**WARNING:** This product is not recommended for use by young people or non smokers. It is sold purely for recreational purposes; it is not a smoking cessation product and has not been tested as such.

**HEALTH WARNING:** This product may be used with liquids containing nicotine

which is a highly addictive substance. It is not suitable for persons under the age of 18, women who are pregnant or breast-feeding, for persons with a high risk for heart disease, high blood pressure or diabetes, or for people taking medicines for asthma.
